-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18, 25-30 and 47-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abdulkader US 2002/0120838 in view of class subclass definition 607/31 attached hereto, or in view of Batty, Jr. As noted previously, Abdulkader teaches applicant's method and device for encrypting data for security purposes but does not teach its use in an implantable medical device. However, class/ subclass definition for 607/31 is dedicated to remote controlable, programmable implant devices. To have use the Abdulkader method in a implantable device that requires secure communications would have been obvious since there is a whole subclass for implantable device requiring such feature and Abdulkader teaches a new method for secure communication. Alternatively, Batty is cited as but one patent from this subclass to demonstrate an example. To have used the Abdulkader methods in the Batty device would have been obvious.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark W. Bockelman whose telephone number is (571) 272-4941. The examiner can normally be reached on Monday - Friday 10:00 to 6:30.
